Seats	2

The all new FireBringer is bringing back the body style of the 2020's and combining it with the technology of the 2080's. This revolutionary new bike has some amazing features, a new active gyroscope so a rider never falls down, a newly updated piloting soft so you can always get home. This new pilotsoft continually updates through wireless matrix connections.

This bike has several hardpoints for mounting defensive weapons (military and law enforcement models) and run-flat tires so you never have to worry about what is being thrown your way. These new improved tires work just as well with potholes or bullet holes.

Namesake Enchantment package: This package is a first for any automotive manufacturer in the world. We have hired the best mages that money can buy to give you the Namesake Enchantment. The FireBringer is an illusion enchantment that, when activated, makes it look like you are engulfed in a blue fire. The fire leaves a trail behind you and flows with the wind. This illusion can be started and stopped with the touch of its owner.

Included in all our new bikes is Threatcon anti-theft and auto tracking device. It turns the wireless search on when the bike has been reported stolen. It has an internal power supply and

has been hardened against EMP making it hard to shut off. This anti-theft device is now standard on all new bikes.

Here are the packages:

Base 15,000Y

Run-Flat Upgrade add 2,000Y

Hard Points add 2,000Y Each up to 3

Namesake Enchantment 7,000Y

Total for all is discounted to 24,000Y with all 3 hardpoints and everything else.
